ABSTRACT
of the dissertation of Doctor of Philosophy (PhD) in Economics

TASHKENT– 2025

The theme of the dissertation of the doctor of Philosophy (PhD) in economic sciences was registered at the Supreme Attestation Commission under number B2024.II.PhD/Iqt4079.

The dissertation has been prepared at Tashkent State Economic University

The abstract of the dissertation is available in three languages (Uzbek, Russian, and English (resume)) at the website of the Scientific Council (www.nordicuniversity.org) and on the information and educational portal «Ziyonet» (www.ziyonet.uz)

Scientific supervisor: **Kholmuminov Shoyzok Rakhmatovich**
Doctor of Economic Sciences, Professor

Official opponents: **Karimkulov Djasur Imomboevich**
Doctor of Economic Sciences, Professor

Djumaev Nodir Khosiyatovich
Doctor of Economic Sciences, Professor

Leading organization: **Tashkent branch of the Russian Economic University
named after G.V. Plekhanov**

The Defense of the dissertation will take place on «15» 01 2025 at 14:00 at the meeting of the Scientific Council PhD. 03/29.12.2022.1.157.01 awarding scientific degrees at International UniversityNordic Address: 100143, 22a Sebzor Street, Tashkent. Phone: (95) 505-44-00; fax (95) 505-33-00; e-mail: info@nordicuniversity.org

The dissertation can be reviewed at the Informational Resource Center of International UniversityNordic (registered under № 6). Address: 100143, 22a Sebzor Street, Tashkent. Phone: (95) 505-44-00; fax: (95) 505-33-00.

The dissertation abstract was distributed on «05» 01 2025.
(Mailing report № 6 on «08» 01 2025).

Chairman of the Scientific seminar
of the scientific council for
awarding scientific degrees, doctor
of economics, professor

INTRODUCTION (abstract of PhD dissertation)

The aim of research work is to develop scientific and practical proposals and recommendations aimed at improving the practice of financing higher educational institutions in the Republic of Uzbekistan.

The object of the research work is the practice of financing the activities of higher educational institutions of the Republic of Uzbekistan.

Scientific novelty of the research work is as follows:

it is proposed to increase the efficiency of using budget funds based on the effectiveness of a grant from the state budget by linking funding from the state budget with the academic performance of students when paying them monthly scholarships, as well as when concluding contracts with them;

it was proposed to develop competition in the higher education services market based on the introduction of an education performance indicator for the selection of a non-governmental organization of higher education when financing a state order;

it was proposed to prevent financial speculation in the higher education services market by ensuring the share of full-time education in higher education enrollment is at least 50 percent;

it was proposed to achieve financial profitability based on determining the academic ratio by establishing a minimum criterion for the number of academic groups.

Implementation of the research results. Based on the scientific results obtained for improving the financing practices of higher education institutions:

A proposal to enhance the efficiency of budget fund utilization based on grant effectiveness from the state budget by linking funding from the state budget to students' academic performance when awarding them monthly scholarships, as well as when signing contracts with them, has been implemented in accordance with point 2 of the Presidential Decree of the Republic of Uzbekistan dated May 24, 2024, No. DP-81 "On Improving the Admission System to Higher Education Institutions and Allocating State Orders" (reference from the Ministry of Higher Education, Science, and Innovations dated November 15, 2024, No. 03/03-3275). As a result, the effectiveness of educational grants has increased.

A proposal for developing competition in the higher education services market based on the introduction of an educational effectiveness indicator for selecting non-state higher education organizations when financing state orders has been utilized in accordance with point 16 of Appendix 1 to the Presidential Decree of the Republic of Uzbekistan dated February 21, 2024, No. DP-37 "On the State Program for Implementing the Strategy 'Uzbekistan - 2030' in the 'Year of Support for Youth and Business'" (reference from the Ministry of Higher Education, Science, and Innovations dated November 15, 2024, No. 03/03-3275). As a result, the quality of education has improved, and the effective use of budget funds has increased through the participation of non-state higher education institutions in the allocation of state orders.

A proposal to prevent financial speculation in the higher education services market by ensuring that the share of full-time education in higher education coverage

is at least 50 percent has been used to ensure compliance with point 1 of the Presidential Decree of the Republic of Uzbekistan dated May 24, 2024, No. DP-81 "On Improving the Admission System to Higher Education Institutions and Allocating State Orders" (reference from the Ministry of Higher Education, Science, and Innovations dated November 15, 2024, No. 03/03-3275). Consequently, from the beginning of the 2024/2025 academic year, a procedure has been implemented to establish a common admission parameter for other forms of education in higher education organizations, not exceeding the established admission quota for full-time education.

A proposal to achieve financial profitability based on determining the academic ratio by establishing a minimum criterion for the number of academic groups has been utilized in the implementation of point 2 of the Cabinet of Ministers of the Republic of Uzbekistan dated August 26, 2020, No. 517 "On Approving the Regulation on the Procedure for Material Incentives for Professors, Teachers, and Other Categories of Employees of Higher Educational Institutions of the Republic from Extrabudgetary Funds" (reference from the Ministry of Higher Education, Science, and Innovations dated November 15, 2024, No. 03/03-3275). As a result, the norms for the number of students per teacher in the special part-time and part-time forms of education have been abolished, and the number of students studying in this direction increased by 2.5 times, or by 379,000 people, compared to 2021.

The structure and scope of the dissertation. The dissertation consists of an introduction, three chapters, a conclusion, a list of references and appendices. The total volume of the work was 121pages.
